TOP 3 ACTIONS — DÉMARRER CETTE SEMAINE

1. Raise all contract prices by minimum 20% immediately. Stop accepting work with negative margin.
2. Send collection notices Monday. Require 30–50% advance payments on all new contracts.
3. Apply for €10,000–€15,000 bank credit line this week. You have zero buffer against any shock.

02. PLAN D'ACTION 30 JOURS

FEUILLE DE ROUTE OPÉRATIONNELLE — PRIORISÉE PAR URGENCE ET IMPACT FINANCIER

ÉCHÉANCE	ACTION	IMPACT FINANCIER	PRIORITÉ
Week 1–2	Raise prices +20% on all new contracts	Restore GM: -2% → +18%	URGENT
Week 1–2	Send overdue collection notices	Free up to €4,600 cash	URGENT
Week 1–2	Apply for €10,000–€15,000 revolving bank credit line	Extend runway beyond 3.3 mo.	URGENT
Week 3–4	Require 30–50% advance on every new contract	Reduce WC need immediately	URGENT
Month 1–2	Formalize 60–90d AP terms with suppliers	Reduce payment pressure	ÉLEVÉ
Month 1–2	Build 13-week rolling cash forecast	Early warning system	ÉLEVÉ
Month 1–2	Factor receivables > €5,000 (cost: 2–3%)	Immediate cash conversion	ÉLEVÉ
Month 3+	Per-project profitability tracking	Eliminate hidden losses	STRATÉGIQUE
Month 3+	Stop all dividend distributions	Rebuild equity above 30%	STRATÉGIQUE
Month 3+	Diversify client base (target: 5+ clients)	Reduce concentration risk	STRATÉGIQUE

⚠ Base scenario cash runway (8.9 months) is **misleading**. It assumes suppliers continue financing indefinitely. Realistic pressure scenario: **3.3 months**. Plan for the worst case.

03. DIAGNOSTIC FINANCIER

Chiffre d'Affaires et Rentabilité · Section 1/4

PROFITABILITY SWING: FY2024 → FY2025

Gross margin, net result, ROE, ROA — full reversal in one year

CE QUI SE PASSE

Gross margin: +€4,591 (FY2024) → -€551 (FY2025). Turned negative.
Net result: €3,504 → -€6,575.
ROE: +5.2% → -10.9%. ROA: +3.8% → -10.1%.

POURQUOI C'EST IMPORTANT

Every project you accept deepens losses. Revenue growth = accelerated cash destruction.

● CRITIQUE

P&L COMPARISON FY2025 VS FY2024

Revenue grew — but costs grew faster

CE QUI SE PASSE

Revenue grew but costs grew faster. Gross margin from +8.3% to -1.0%.
Operating charges (personnel, subcontractors) represent ~101% of revenue.

POURQUOI C'EST IMPORTANT

The pricing model is fundamentally broken. Fix pricing **before** taking any new work.

● CRITIQUE

03. DIAGNOSTIC FINANCIER

Flux de Trésorerie · Section 2/4

CE QUI SE PASSE

Operating CF (before WC): **€1,035**. True cash generation is negative. WC changes contributed -€8,615 — supplier credit added -€702 in new payables. Net cash change: -€6,776. This is borrowed time, not earned profit.

POURQUOI C'EST IMPORTANT + RISQUE

When suppliers demand payment, €4,872 cash evaporates instantly. 10% of “cash generation” is unpaid bills. This is not a business generating cash — it is a business **delaying insolvency**.

● STABLE

WC EVOLUTION

Current assets vs short-term liabilities

AR VS AP POSITION

You are financing your clients

CE QUI SE PASSE — POURQUOI C'EST IMPORTANT

WC moved +1.8% against a balance-sheet variation of -30.1%. AR: €9,250 vs AP: €2,327. Net trade position: €6,923. Growth without collection discipline drains cash.

● STABLE

03. DIAGNOSTIC FINANCIER

Position Financière · Section 4/4

CE QUI SE PASSE

Equity ratio: **93.5%** (sector threshold: 25%). Debt/equity: **0.07×** (safe: <1.5×).
ROE: **-10.9%** | ROA: **-10.1%**.
Capital-structure deterioration: zero long-term debt, zero credit facilities, zero reserves.

POURQUOI C'EST IMPORTANT

SOLIDE (≥ 40%). The path to financial stability runs through profitability — current ROE -10.9%.

SOLIDE

Ratio	FY2025	FY2024	Status
Current Ratio	1.15	2.22	LOW (<1.5)
Cash Ratio	0.26	0.36	VERY LOW
Equity Ratio	93.5%	72.4%	SOLIDE (≥ 40%)
Debt/Equity	0.07×	0.38×	VERY HIGH
ROE	-10.9%	+5.2%	NEGATIVE
ROA	-10.1%	+3.8%	NEGATIVE

04. ANALYSE DE SCÉNARIOS

MODÉLISATION DE L'HORIZON DE SURVIE — TROIS SCÉNARIOS

⚠ SCÉNARIO DÉFAVORABLE

3.3

mois de trésorerie

Trésorerie: €2,097

NON VIABLE. A single client default could trigger insolvency at this runway.

— SCÉNARIO DE BASE

8.9

mois de trésorerie

Trésorerie: €4,872

WARNING: Assumes unlimited supplier financing. Realistic horizon: see worst case.

✓ SCÉNARIO FAVORABLE

17.3

mois de trésorerie

Trésorerie: €9,497

VIABLE IF: 50% of receivables collected in 30 days. Requires immediate collection action.

What must be true for success: (1) No client defaults; (2) All new contracts priced at +20%; (3) 50% advance payments from all new clients; (4) Bank credit line secured within 30 days. Without all four conditions, the base case is unsustainable.

05. RISQUES CLÉS ET POINTS DE VIGILANCE

CINQ FACTEURS DE RISQUE CRITIQUES NÉCESSITANT UNE SURVEILLANCE ET UNE ATTÉNUATION ACTIVES

#	RISQUE	DESCRIPTION	IMPACT POTENTIEL	MITIGATION
1	Negative Gross Margin	Losing money on every project in FY2025	Deepening losses with every sale	Immediate price increase +20% on all new work
2	Supplier Payment Demand	€2,327 AP could be called at any time	Instant cash crisis, potential insolvency	Formalize 60–90d terms + secure credit line
3	Client Default Risk	Top receivable concentration (likely 1–3 clients)	Single default wipes out all cash	Advance payments + invoice factoring
4	No Financial Safety Net	Zero credit line, zero reserves, zero provisions	Any shock = insolvency cascade	Apply for €10,000–€15,000 revolving credit this week
5	Equity Erosion	93.5% equity ratio — SOLIDE (≥ 40%)	Loss of creditworthiness, no rescue financing	Stop dividends; restore profitability first

06. RECOMMANDATIONS STRATÉGIQUES

DU DIAGNOSTIC À L'ACTION — PRIORISÉES PAR IMPACT ET FAISABILITÉ

URGENT — 0 À 2 SEMAINES

- 1. Fix Gross Margin — Raise Prices 20%**

Renegotiate ALL in-progress contracts if possible. Minimum +20% on all new work. Implement cost tracking per project.

Impact: Restore GM from -1% to +18% | **Moyen**
- 2. Accelerate Collections — Target €4,600**

Send formal payment notices to all clients. Require 30–50% advance on every new contract, effective immediately.

Impact: Free up to €4,600 in 30 days | **Facile**
- 3. Secure €10,000–€15,000 Revolving Bank Credit Line**

Contact your bank today. Present balance sheet + projection. A revolving facility is the minimum safety net.

Impact: Extend worst-case survival beyond 3.3 months | **Moyen**

PRIORITÉ ÉLEVÉE — 1 À 2 MOIS

- 4. Formalize Supplier Payment Terms (60–90 days)**

Current supplier delays are informal. Formalize to reduce legal and relationship risk.

Impact: Preserve €2,327 cash buffer | **Facile**
- 5. Implement 13-Week Rolling Cash Forecast**

Weekly visibility on cash position. Flag gaps 4–6 weeks ahead before they become crises.

Impact: Early warning system for cash crises | **Facile**
- 6. Factor Large Receivables (>€5,000) — Cost: 2–3%**

Immediate cash conversion on major invoices. The 2–3% factoring cost is worth the liquidity.

Impact: Converts up to €9,250 receivables to immediate cash | **Facile**

STRATÉGIQUE — 3+ MOIS

- 7. Stop All Dividends Until Equity >30%**

Current equity at 93.5% — SOLIDE (≥ 40%). No distributions until profitability and equity are restored above banking thresholds.

Impact: Rebuild creditworthiness and equity base | **Easy (discipline)**
- 8. Per-Project Profitability Tracking**

Implement job costing for every project. Identify and eliminate loss-making work immediately. No project without a margin target.

Impact: Prevents hidden losses, supports pricing discipline | **Moyen**
